

TYPE SPECIMEN

Robotón

by Ariel Martín Pérez

Kobata

30 pts

Kobata is an experimental typeface based on some simple rules:

- 1) The only possible shapes are rectangles and circles.
- 2) Rectangles can't touch each other on their sides to create more complex shapes, they can only meet by their corners.
- 3) Circles are the only shape of which the size can be optically corrected by diverting from the 50x50 UPM grid.

If you want to modify and/or develop this typeface, please follow this rules.

Quick fox jumps nigh•tly ab•ove wizard. A very bad quack might jinx zippy fowls.

16 pts - too small!

Before we give over to our patrons the care of the plants, it would be necessary to mention some points about the climate of Japan, as we meet so many persons who think Japan is a tropical country, and treat the plants accordingly. It is in the most cases the cause of failure of their keeping Japanese plants alive. The Empire of Japan extends from northeast to southwest about 1500 miles, and its breadth varies from 70 to 350 miles, occupying its position from 24° N. Lat. to 50° N. Lat., and from 122° E. Long. to 158° E. Long.
